

For Redwoods and Workers: Boycott the Gap!

The Gap family is clearcutting redwood forests, using toxic herbicides & logging the last old growth trees, and is exploiting desperately poor people to make Gap clothes...

© Curtis 1999

The Fisher family of Gap, Inc., and their “Mendocino Redwood Company,” are heavily logging the already ravaged redwood forests in Mendocino and Sonoma Counties. Endangered species, such as the coho salmon, are being destroyed. With our planetary environment at great risk from deforestation, the Fishers--with a reported fortune of 12 billion dollars--are clearcutting redwood forests for profit! The Gap is also exploiting sweatshop labor. (The Fishers helped write the global trade textile rules that promote slave labor worldwide.) Use your consumer power to stop corporate lawlessness. Boycott Gap, Banana Republic and Old Navy stores! For more information, see other side...
